

The 2nd USPS National Safe Boating Test

Topics: Homeland Security, Rules of the Road/Water, Aids to Navigation, Carbon Monoxide, Small Boat Safety

Target Age: High School Students to Adults

Description:

There are some 80 million recreational boaters in America engaged in all sorts of activities from paddling to cruising, from fishing to sailing. Yet many states do not require certification of any kind to operate a recreational boat. That's why the US Power Squadrons, in cooperation with the US Coast Guard, has produced this program. By watching this program, you can test your knowledge on topics important to your boating enjoyment. Featuring 27 questions on a wide range of boating topics you will watch real life scenarios and answer questions about what you would do in these situations. As you watch, score yourself. You may want to hone your skills and increase your knowledge. We suggest that you take a safe boating course to help make your boating a safer and more enjoyable activity.
